

## **Milan, Italy – March 01, 2006**

*PeterTools*, the young Italian software house know for its live performance tool *LiveSet*, today announced the release of *Hammer*, the audio input tool for Propellerhead Software's Reason.

*Hammer* provides the functionalities to route ASIO audio input to Reason for live processing, widely spreading the possible range of applications! It captures audio signals coming from your ASIO soundcard and route them to Reason through the ReBirth Input Machine device: just add a reverb, do guitar distortion or experiment cool voice vocoding...

*Hammer* ships on CD's including a special *Hammer ReFill* featuring Combinator effect patches for live processing. Any version of Propellerhead Reason is supported (from 1.0 to 3.0.4). *Hammer* do not corrupt previous Propellerhead ReBirth installation.
